

SAGE software

The practice became a **sage** dealer in August 1993 and also began sourcing hardware for clients in that year. Our extensive involvement with computer hardware, Sage software and other leading software products, allows us to offer valuable computing advice to our clients.

The Sage dealership has seen rapid expansion as follows:

- 1993 - Commenced sale of Sage Sterling (now Line 50)
- 1994 - Sage payroll software
- 1996 - Sage Instant
- 1997 - Sage Sovereign (Line100)
- 1999 - Sage Web Site Creator and E-Commerce packages

Advantages

- Sage is the leading accounting software package in the UK.
- If you use Sage or plan to, having an accountant who can understand your software and, indeed, advise you on the use of it, is a big advantage.
- Clients who use Sage can supply their accounting records to us on a disk or via email rather than providing hard copies of everything.
- Who better to advise you on the implementation and maintenance of your accounting records on Sage, than your own accountant?

“We can ensure that our valued clients successfully implement the market leading accounting software”.
