

taxation

Billions of pounds are paid in tax unnecessarily each year. With so many different taxes and so many constantly changing regulations, the importance of finding a good taxation practitioner is becoming ever more important.

At Derek Young & Co. we ensure that tax liabilities are minimised and peace of mind is maximised:

- Y** Our taxation department make life as easy as possible for our clients with clear, concise requests for information coupled with reminders of deadlines on a timely basis.
- Y** On receipt of information from clients, tax computations and returns are produced quickly and efficiently using our fully integrated computer systems which utilise data from our accounts production software thus eliminating any duplication of effort.
- Y** Tax liabilities or refunds are notified immediately to clients along with due dates, enabling them to plan future cash flows and giving them maximum peace of mind.
- Y** All taxation staff are kept right up to date with the very latest regulations via a programme of continuing professional education including regular attendance at seminars.

Beyond tax returns:

- Y** A proactive approach is taken to tax avoidance planning. Within existing legislation, we can advise clients on the tax efficient opportunities to be taken advantage of.
- Y** Advice is given, for example, on tax efficient methods for taking money out of your business, on planning for the future in light of Inheritance Tax rules, on the use of Trusts, selling your business in a tax efficient manner and many other areas.

“Taxation is a fact of life, minimising the burden is where Derek Young & Co. excel”.
