

# Origami Double Banger

Take rectangular sheet of paper

Fold from top to bottom, and from left to right, making creases, and then open out again

Fold in each corner along centre crease

Fold left half over & on top of the right half

Hold bottom half down with left hand, slide right hand (palm towards you) inside top half

Pull top half towards you while flattening the top half with your opened-out right hand, palm downwards

Remove right hand, crease well

Hold bottom half down with left hand

Turn lower point of top square up to meet the top point

Hold top half down with left hand. Slide right hand inside bottom half

Pull bottom half towards you while flattening the bottom half with your opened-out right hand, to cover the top half

Fold bottom point up to top point. Crease well

Turn banger to right. Pick up in right hand at the bottom but then turn point 'B' to face away from you

Push corners 'B' and 'C' together away from you and pinch bottom of both sides together. Snap banger downwards away from you.

One or both 'pockets' will have banged. If only one, snap it again to let the other pocket bang.

To repeat, tuck both 'exploded pockets' back into the banger

*Holding the banger correctly and snapping it are the hardest parts to teach youngsters*
