Amendments, additions and clarifications

Clarification Questions

Q. Are there size modifiers when firing against missiles?

A: No, these have been factored in to the combat system already.

Q: When do you resolve chaff vs. missiles?

A: This is resolved immediately prior to the missile hitting (i.e. resolve anti missile fire first, then chaff effects)

Q: Are ships' guns able to fire against incoming missiles?

A: Only CIWS are capable of firing at missiles. (NB: this is a simplification, but is generally correct. A later amendment may include lists of other guns that are capable of engaging missiles)

Amendments

- Change P-4 torpedo armament from "21" TTU" to "450mm TTU"
- Change Grisha 1/2/3 FCS from "21" to "2"

.
